

INFRARED REMOTE CONTROL

ARC1

The Infrared Remote Control is Astera’s most basic handheld LED controller. Its 28 buttons are used to change colors and programs, and increase the brightness, fade and speed of our wireless product range. For smaller projects, the nifty ARC1 is ideal.

This pocket-sized, lightweight remote has signal strength of 10m. The ARC1 is perfect for the uncomplicated event user and also very useful as a backup device for professional users.
